

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: March 27, 2008

Water Body Under Evaluation:

Water Body ID #: 0613
Name: West Fork Locust Creek (Class C)
Length of Segment: 17.0 miles
County(ies): Sullivan

Use Attainability Analysis (UAA) Study:

UAA ID #: 0625
Submitter: Pickett Ray & Silver
Date(s) Conducted: September 18 and 19, 2007
Date Received: October 31, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in September 2007 and no WBCR was observed. No interviews were conducted during the survey.

Is the evaluated use attainable? ☐ Yes ☐ No

Comments: Ten sites were evaluated, but the committee concluded the stream was not at baseflow due to the following evidence: Note that “It rained last night” (the night of 9/18), the weather is listed as “rainy/fair”, and at #9 “Spoke to DNR biologists doing work at this site and they commented that a few weeks ago there was very little to no water in streams, but now there are large pools due to beaver dams”. Due to these observations, the UAA is considered inconclusive.

Committee Recommendation: ☐ Add Use ☐ Retain Use ☐ Remove Use
☐ Modify Use ☒ Inconclusive
